Overview

As an administrator of an Essentials plan or higher, you have control over your users' forms.

Search for a Form

You can search for a particular form by navigating to **Admin Dashboard → Forms → All Forms**.

You can search for a form by the Form ID, Form Name, Form Content, Form Owner (username), Email (of the owner), User ID (of the owner), Form Spam Filter, Builder Version, and Status.

If you choose to search by form content, this will search all field labels, all HTML content, and all text content.

If you choose to search by status, you will be able to filter by "Active", "Archived", or "Deleted" status.

These search options can be applied as Filters, and combined with either 'AND' or 'OR' logic to further refine your search queries. To apply filters, select the Filter (funnel) button within the search bar and configure your choices.

All Forms

Q Search

A Status Active

B Form Content registration

And Logic A AND B

Reset Filters Apply Filters

The All Forms list can be sorted by each column using the arrow icons next to each column header (Form ID, Form Name, Form Owner, Response Count, Active Connectors, Connector Errors, and Last Edited Date).

Note: The Connector Errors column displays a count of connector errors for form responses within the last 7 days. This count only includes errors for connectors that are **active**.

Q Search

AND Form Content: registration Status: Active

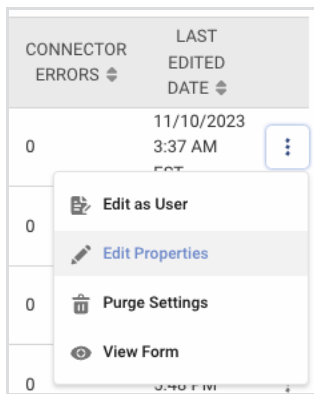

STATUS	FORM ID	FORM NAME	FORM OWNER	RESPONSE COUNT	ACTIVE CONNECTORS	CONNECTOR ERRORS	LAST EDITED DATE
--------	---------	-----------	------------	----------------	-------------------	------------------	------------------

Once you have found the form you are looking for, you can perform any of the functions described below.

Change Form Owner

You may transfer the ownership of a form to another user. This is useful when a user is leaving the organization, or when the creator is not going to be maintaining the form. To change ownership of a form:

1. Look up the User ID of the new owner with the **User** tab search
2. Look up the Form ID of the form you'll be transferring, under the **All Forms** search
3. Browse to: **Admin Dashboard | Forms | All Forms**
4. Search for the Form ID you found above
5. Click the vertical ellipsis on the right to select **Edit Properties**

6. Select the new owner's User ID (step 1) from the **Owner Username** dropdown menu
7. Click **Apply**

Delete Forms

To delete a form:

1. Browse to: **Admin Dashboard | Forms | All Forms**
2. Search for the form you want to delete
3. Click the vertical ellipsis on the right to go to **Edit Properties**
4. Under **Expired**, check the "Check to delete this form" box

EXPIRED
☐ Check to delete this form (can be undone)

5. Click **Apply**

You can undo this action and restore a form. See below for details.

Restore a Form

To restore a form:

1. Browse to: **Admin Dashboard | Forms | All Forms**
2. Search for the form you want to restore
3. Click the vertical ellipsis on the right to go to **Edit Properties**
4. Under **Expired** uncheck the "Check to delete this form" box
5. Click **Apply**

The form will become available again, and collected data will be restored.

Preview Forms

You can preview forms that you have selected to be templates.

- Browse to: **Admin Dashboard | Templates**
- Click on the **Preview** button next to the form.

Forms will not submit a response from this page.

Edit Properties Options

Here's an overview of what you can **change** as an administrator on the **Edit Properties** page:

- Change Form Name
- Update Moderation Status
- Change Form Language
- Update Status
- Enable/Disable SSL
- Enable/Disable Captcha
- Enable/Disable Save & Resume
- Enable/Disable Confirmation Page
- List as a Template
- Set Category and/or Subcategory
- Change Form Owner
- Delete and Restore Form

You may **view** the form's version number, the date of creation, and the last modified date.

Changing Form and Workflow Ownership as a User without Administration Permissions

Any user account that is an owner of a form may transfer ownership of their form to any other user account within their FormAssembly instance without administrative restrictions. This means that form ownership transfer is no longer required to be completed by an admin, freeing up administrators to complete other tasks.

- If you would like your users to transfer ownership of their own **forms**, please navigate them to our [Form Collaboration](#) article.
- If you would like your users to transfer ownership of their own **workflows**, please navigate them to our [Workflow Collaboration](#) article.
