Introduction

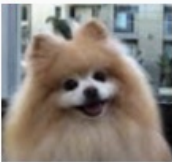

Engage your users by using images as choices on radio button and checkbox questions. You can have your users make a selection by using the traditional boxes, or by removing them all together so they can click directly on the image.

To use this feature, your form must be on form builder version 4.3.0 or higher. The version is noted in the bottom left of the form builder.

Cats

Replace Text with an Image

1. Add a radio button or checkbox question to your form.
2. Select a choice.
3. Click **Image** and choose an image to upload.
4. Provide **alternate text** for your image. This text will display if the image does not display properly, but it is also used in other areas of FormAssembly.
5. Define the **width** and/or **height** of the image.
6. Change the **image alignment**, if needed.
7. Click **Insert**.

The screenshot shows a form editor interface. At the top, there are navigation tabs: 'ADD CONTENT', 'THEMES', 'PROPERTIES', and 'OUTLINE'. On the right, there are buttons for 'Preview', 'Undo', 'Redo', and 'Save'. The main form area is titled 'Form Title' and contains a 'Sponsorship Level' field. This field has three radio button options: 'Sapling \$300 / Month' (with a tree icon), 'Seedling \$100 / Month' (with a seedling icon), and 'Choice C'. A 'Submit' button is located below the options.

Masking

You can choose to mask the radio button or checkbox when replacing the choice text with an image. The images themselves will then act as buttons that users can select.

This can make for a better user experience in some cases. For instance, if the image meanings are clear and understandable, masking could be a good choice. However, if you would like to show the images in full color at all times, masking is not a good choice because the options that are not selected will be grayed out.

1. Select the entire radio button or checkbox field
2. Click the **Options** button
3. Click on the **Presentation tab** to expand it.
4. Select **Mask checkbox/radio buttons**
5. Click **Done**.

Check out the animation above for a quick walkthrough of this process.

Using Image Fields in other areas of FormAssembly

Planting Seeds in Your Community

Thank you for your interest in contributing to our Youth Community Garden Project!

Please select a sponsor level below or type a custom amount.

Sponsorship Level

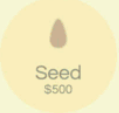

Blossom
\$1500

Sapling
\$1000

Seedling
\$800

Seed
\$500

No Level

I would like to donate a different amount.

Total Donation Amount
0.00

You can still use multiple choice fields with other features when you've replaced the text with images. The ALT text you provide when uploading the images is how you can reference them elsewhere. Here are a few examples:

Calculations

Calculations i

This is a variable

Choose a name for this variable:

Examples: QUANTITY, QTY or PRICE

This is a multiple-choice question. Assign a value for each choice:

Level 1	=	<input type="text" value="100"/>
Level 2	=	<input type="text" value="500"/>
Level 3	=	<input type="text" value="1000"/>

Membership Level

Level 1

Level 2

Level 3

Salesforce Connector

In the Salesforce connector you can also use the send-as values to define what values will be sent to Salesforce by the connector:

GET THEIR VALUE FROM:

a field in your form

Membership Level

This is a multiple choice question. You may provide alternative labels to send to Salesforce.

THESE CHOICES:

WILL BE SENT AS:

Level 1

=

Bronze

Level 2

=

Silver

Level 3

=

Gold
