Introduction

If you are using our Date/Time [predefined content field](#) to collect date and time information from your respondents, you might want to know how that field will be validated.

The overview and example sections below provide a quick overview of what date/time formats are accepted.

Date/Time Validation Overview

When using our Date/Time predefined content field, the following values will be considered valid. Please note that this validation is case insensitive if letters (e.g. AM, PM) are being submitted.

- Date followed by 12 hour time
- Date followed by 24 hour time
- 12 hour time followed by date
- 24 hour time followed by date
- Just date
- Just 12 hour time
- Just 24 hour time

Examples of Valid Dates & Times

Please see the sections below for a detailed explanation on how these valid examples are determined by the regex validation rule.
