## Error

Data value too large

This error means that the value submitted to Salesforce exceeds the maximum character length set for the Salesforce field.

## Resolution

Apply character limit to the text field that is throwing the error. To add a character limit, select the field and click Options > Validation Rules and enter a number in the "Limit length of answer" box.

The screenshot displays the 'Field Properties' dialog box in Salesforce. The 'Validation Rules' section is expanded, showing the following settings:

- Require this field:** A toggle switch is currently turned off.
- Expected Input Format:** A dropdown menu is set to 'None'.
- Limit length of answer:** A text input field contains the number '250', and a dropdown menu is set to 'characters'.

Below the dialog, a rich text editor toolbar is visible with icons for Bold, Italic, Underline, Image, Link, Clear, Req'd, Options, Copy, Delete, and Done. The editor content includes a 'Case Description' text area and a 'Contact Details' section with a 'First Name' text input field.
