Introduction

We have so many features and options available to you in our form builder. Here is a list of some of our most popular features! If you'd like to know more, you can click the link under any of the feature titles.

Save and Resume

Allow your respondents to [save their forms and resume them later](#).

E-Signature

Collect signatures from your form respondents. This feature requires a Premier plan or above.

Workflows

Connect your forms to create a seamless experience for your respondents. You can even set up connectors on each form to collect data as your respondents proceed through the FormAssembly

Workflow!

Conditional Rules

Conditionally show or hide fields, sections, or even pages of your form based on how your respondent selects on a multiple-choice field.

Autosuggest Menus

Upload a CSV file containing picklist options to create a large, searchable picklist. You can also use columns to prefill subsequent fields based on the selection your respondent makes in the Autosuggest Menu. Requires Premier plan or above.

Dynamic Picklists

Pull values in from Salesforce to create a dynamic, searchable picklist in your form. Requires an Essentials plan or above **and** a Salesforce Connector Add-on.

Menu Dependencies

Create parent and child dropdown menus to have your respondents' selections in the first field change the available options in the second field.

Google reCAPTCHA

Add reCAPTCHA to your forms to help prevent spam submissions and add extra enforcement to your required fields in your form.

PDF Generator

Download PDFs of your responses, send a PDF of the response through email notifications and send PDFs to Salesforce. Requires a Premier plan or above.

Respondent Authentication

Require that your respondents log in before filling out your forms. Available options include SAML, CAS, LDAPS, and Salesforce Communities authentication. Requires a Team plan or above.
