Changes & Bugfixes

- If the Auto-mask and character limits are configured with different values, the field input will prioritize the Auto-mask setting but the countdown will still display according to the configured character limit.

- A shopping cart encryption unavailable message no longer shows for PayPal connectors set up with a Business or Premier PayPal account.

- Signed sealed email notifications for E-signatures will not go out if notifications are disabled.

- A proper validation error is shown when using a relative date validation on a date field for a form in Nederlands language.
