Highlights

We are excited to announce the release of the Webhook Connector, an advanced feature available as an add-on for customers on Teams, Enterprise, and Government plans. This powerful connector enhances your Workflow capabilities by allowing seamless integration with external endpoints using a variety of authentication methods and data formats.

Key Features:

- **Authentication Support:** Integrate securely with endpoints using OAuth, Basic Auth, or API Key.
- **HTTP Methods:** The Webhook Connector supports the following methods: GET, POST, PATCH, PUT
- **Flexible Data Formats:** Send data in the format that suits your integration needs, including JSON, Raw, URL Encoded, Form Data
- **Form Data Integration:** Effortlessly send form data to your desired endpoints, enabling more dynamic and responsive workflows.

The Webhook Connector will significantly expand the integration possibilities within your workflows, offering greater flexibility and control over how you connect with external services.

Availability:

The Webhook Connector is available as an add-on to customers on Teams, Enterprise, and GovCloud plans.

Get Started:

To start using the Webhook Connector today, please reach out to your Account Manager or [contact our Sales Team](#) today.
