Highlights - Workflow Connector Updates

- This release introduces new enhancements to all new Workflow connectors, including Google Sheets, Google Drive, Microsoft Excel, Microsoft SharePoint, Box, DropBox, and Webhook

  - **Preconditions**

    - Actions in connector v3 can be run conditionally by setting up action preconditions. Form fields, formulas, and variables can be used to determine whether an action is run or skipped.

  Dependencies

    - Actions can be linked together to create dependent chains of actions. When used in conjunction with preconditions, a series of actions can be run if a single precondition is satisfied or skipped if a single precondition is not satisfied

  Add description

    - Users can add descriptions to connector actions

  Copy Action

    - Users can copy connector actions. Copied actions contain all configuration details of the original action.
