Changes & Bug Fixes

E-Signature updates on FormAssembly:

- An E-Signature step can now be added to a new or existing workflow
 - A generated document from a Document step with signature tags can be selected to be signed in an E-signature workflow step
 - Multiple signers can be assigned to a document by selecting an email-validated field, a static email value or formula, or a workflow variable
 - Signed documents can be sent through workflow native connectors or attached to an email step
 - All Signers of an E-Signature step will receive an email with a secure link to download the final completed document
-
