Changes & Bug Fixes

E-Signature improvements:

- A new Notifications tab is added to the E-Signature step configuration where the Sender Name and Sender Email can be set for E-Signature notification emails.
- E-Signature logs show the sender email rather than the step name
- Signers can view an audit trail of all E-Signature events when accessing the page to download the completed document
- Workflow owners and collaborators can view an audit trail of all E-Signature events from the step card on the workflow response

Salesforce Workflow Connector issues addressed:

- Improved authentication error logging for the Salesforce Workflow Connector
 - Addressed an issue in the Salesforce Workflow Connector where deleting a precondition field removed mapped formulas in certain cases
 - Resolved an issue in the Salesforce Workflow Connector where actions were not marked as unconfigured when a mapped variable was deleted
-
