Changes & Bug Fixes

Connectors

- Stripe Workflow Connector:
 - The Stripe Workflow Connector features a Checkout section which allows the configuration of transaction-level return variables and transaction metadata
 - Addressed an issue in the Stripe Workflow Connector where an error would not be shown on the Workflow Response page if a Salesforce Workflow Connector errored after the Stripe connector successfully ran
 - The Stripe Workflow Connector can use customized payment methods as defined in the user's Stripe dashboard
 - Return variables *Amount Paid* and *Currency* added to the Stripe Workflow Connector
 - The Stripe Workflow Connector can use *payment ID*, *payment URL*, and *payment status* as return variables
 - Workflow Architects can set custom transaction metadata on Stripe transactions
- Excel Workflow Connector
 - Addressed an issue in the Microsoft Excel connector where an authentication error would occur after using the Refresh Lists feature
- Salesforce Form-native Connector
 - Update Salesforce API to v64 in the form-level Salesforce connector
- DropBox Workflow Connector
 - Issue resolved in the DropBox connector where an error occurred if a file was not added to a repeatable file upload field

E-Signature

- A form response can be selected as a document in an E-Signature step
- FormAssembly Atlas Explorer plans that have purchased the Single Signer E-Signature add-on now have the ability to control which users have access to the E-Signature step

Workflow

- Signature step in their workflows through a permission.
- Resolved issue for Workflow File Upload where only the first file was uploaded

FormAssembly Atlas Explorer Trials

- Fixed an issue with form response PDFs sending through email attachments for trial users
- Resolved an issue where new trial instances didn't have a role for the user but feature flag provider expects a role
- Trial users can now access the Admin Dashboard upon sign-up
- Resolved an issue with hiding a trial banner within the FormAssembly Classic experience even if Trial = True

Other

- Allow users to access the Form Builder in Salesforce without seeing a hash error
 - Resolved an issue with dangling elements in workflow created by Fai
 - Resolved an issue for JWT Auth still showing up on FormAssembly Classic Instances
-
