Changes & Bug Fixes

E-Signature: Multi-Document Support

- **Select multiple generated documents** in an E-Signature step
- Added a clearly labeled **Documents** tab with multi-select UI
- Visual confirmation of selected documents with removal controls
- Improved step validation and navigation feedback
- **Merged document packet support** allows selected documents to be combined into a single PDF for signing
- E-Signature beta tag has been removed

Payments: PayPal One-Time Charges (New)

- Introduces **end-to-end PayPal payment support** for workflows
- Workflow designers can configure a **single-item charge** (name, price, quantity)
- Users are redirected to PayPal checkout and returned upon completion
- Workflow execution logs capture PayPal order IDs and statuses
- Includes UI configuration, backend processing, validation, logging, and sandbox testing

Workflow List & Analytics Improvements

- Restored **Error**, **Error Rate**, and **Average Duration** columns after a prior rollback of these
- Safe rollout of **historical data backfill** without database performance issues
- Improved formatting for zero-value and sub-minute durations (e.g., <1m)
- Workflow List now **excludes Test Mode executions** from production analytics
- User preferences are persisted:
 - List vs Table view

- Sort order
- Search value
- Expanded Playwright automation coverage for sorting, pagination, error counts, and workflow actions

Bug Fixes

- Fixed server-side validation failure for custom regex patterns using trailing whitespace
- Resolved webhook OAuth failures when services return non-integer IDs
- Prevented overwriting of authorization IDs during OAuth flows
- Fixed PayPal redirect validation issues
- Addressed multiple trial provisioning failures related to Salesforce rate limits and record locking
- Fixed PHP exception when accessing uploaded files while not authenticated

Platform, Security & Reliability

- Improved multi-tenant logging to include customer ID context
 - Retired unused feature flags related to legacy cache warming
 - Improved Salesforce OAuth token handling using migration awareness
 - Reduced risk of authorization corruption during token refresh
-
