Changes & Bug Fixes

- NEW FEATURES & ENHANCEMENTS

  - Trial accounts on FormAssembly Atlas can add new users to accounts during the trial period to evaluate the multi-user product experience before purchasing a plan.

  - PayPal Checkout - Return Variables section
    Value Returning variables from PayPal to FormAssembly now allow workflow architects to keep a record of PayPal transactions in FormAssembly, allowing them to use these values elsewhere in their workflow.

  - Audit Logs are no longer visible via URL with no collaboration access to a form
    If someone is not a collaborator on a form owned by a user, they cannot access the audit logs page via a URL to see the contents of that page.

  - PayPal production authentication testing
    PayPal connector users can connect to production PayPal accounts to collect payments during the PayPal connector authentication process. Connected accounts show Production , not Sandbox.

- BUG FIXES

  - Fixed an issue where form response PDF attachments from email steps were not being sent when the notification step is imported to a Workflow

  - Fixed an issue where Save and Resume for JIT Forms was broken in certain configurations
