📦 New Features & Enhancements

Per-Workflow Error Notification Settings Configure error notifications at the individual workflow level so that you receive targeted alerts when a specific workflow fails – giving you faster, more actionable insight without the noise of blanket notifications. Owners now have the ability to enable or disable error notification emails on a per-workflow basis via a new "Notify" tab.

📦 Bug Fixes

SAML Advanced Settings Now Accessible Without Extra Permissions The "Manage IdP Authentications" permission is no longer required to view the SAML Advanced Settings page, so that administrators can access configuration details they need without requiring elevated permissions.
