BUG FIXES

- Fixed an issue where leaving responses selected on the Reports page prevented other responses from displaying correctly.
- Fixed an issue where Dynamic Picklists created by a deactivated user would fail to load, even after updating linked user.
- Improved form field validation messages to use distinct indicators in addition to color cues, and added ARIA attributes – improving the accessibility of form error messaging.
- Fixed a "Something went wrong" error that appeared when retrieving attributes during Form and Instance-level SAML setup.
- Fixed an error with embedded workflows that occurred when rendering dataset fields on form steps.

SECURITY UPDATES

- Applied security patches
-
