Bug Fixes:

- Fixed an issue where the Salesforce Workflow Connector enters an infinite loop when using multiple return variables in a chain with repeatable content, causing 504 Gateway Timeout errors on nested record lookups.
- Fixed an issue where the Form Builder theme editor is sluggish and sometimes causes the browser to freeze/become unresponsive.
- Fixed an issue where User Group members with Full Access cannot view Workflow Connector settings, throwing a "Connector Authorization Record Not Found" error.
- Fixed an issue where unchecking "Validate XML Schema" in SAML settings had no effect when Strict Mode was enabled, causing SAML login failures to persist for affected users.

Security Updates:

- Applied security patches
-
