### NEW FEATURES & IMPROVEMENTS

- Improved performance and load times for JavaScript-embedded workflows, making forms feel faster and more responsive.

### BUG FIXES

- Fixed a series of related issues affecting Save & Resume functionality, where some respondents' form progress wasn't being saved correctly — in some cases preventing them from resuming or submitting, and in others causing resume or review actions to be silently lost during background processing.
- Fixed a bug where downloaded CSV exports had a duplicated file extension (e.g., "export.csv.csv"). The file content was always correct — only the filename was affected.

### SECURITY UPDATES

- Fixed an issue where a security alert label remained visible in SAML settings even after the underlying configuration had been properly secured.
  - Applied security patches.
-
