BUG FIXES

- Fixed an issue where SAML metadata imports could fail to capture the IDP signing certificate when the metadata file contained multiple signing certificates.
- Fixed an intermittent issue causing 502 errors on some form pages, including viewing forms, submitting responses, and viewing reports.
- Fixed a JavaScript error in embedded workflows using Publishing JS v2 with Dynamic Picklist fields.
- Fixed an issue where embedding a workflow on a page could cause the page to automatically scroll down to the workflow.
- Fixed a rare issue that could prevent respondents from resuming a workflow after their session link refreshed.
- Fixed an issue that could leave some workflows stuck on a generic "thank you" message instead of completing correctly.

SECURITY UPDATES

- Applied a security patch

Note: FedRAMP Environment notes only apply to accounts on FormAssembly Gov Cloud Fed and DoDIL4 Plans
