NEW FEATURES & IMPROVEMENTS

- Admins can now view all workflows on their instance in a new paginated, sortable Workflows list in the Admin Dashboard.
- Workflow response access is now based on collaboration role — Auditors, Managers, and Owners can view and export responses, while Editors are restricted from response-related pages and actions.

BUG FIXES

- Fixed an issue causing a "Page Not Found" (404) error when resuming a saved form with no entered data.
- Fixed errors on Workflow Response, Collaboration, and Approval pages when a deactivated user was a collaborator or task owner.
- Fixed an issue where form language translations weren't applied to forms added to a workflow or quick-published.
- Fixed an issue where multi-select list values sent to Salesforce weren't using the correct delimiter.
- Fixed an issue where the Currency field dropdown could be hidden depending on its position in the properties panel.
- Fixed an issue where default values on Checkbox, Multi-Select, and Drop-down fields could get stuck on the Report page.
- Fixed an issue where the CFR step in Workflow Builder didn't display the selected form for workflows created by Fai until the workflow was saved.
- Fixed a message incorrectly indicating reCAPTCHA v1beta1 is deprecated.
- Fixed an "Invalid Logout Request" error when exiting an Admin Override session.
- Fixed a validation conflict on the CyberSource "Stop Billing After" field.

SECURITY UPDATES

- Applied Security patches

Note: FedRAMP Environment notes only apply to accounts on FormAssembly Gov Cloud Fed and DoDIL4 Plans
