IMPROVEMENTS & BUG FIXES

- Fixed an intermittent issue that could cause form pages — including form themes and images — to fail to load, and could occasionally cause a login attempt to fail even with the correct credentials. If you experienced this, a retry usually worked in the meantime; this addresses the root cause.
 - Fixed an issue where reports for forms with a very large number of responses could time out and fail to load.
 - Fixed an issue where setting up SAML single sign-on for the first time could result in an error instead of completing successfully.
 - Fixed an intermittent issue that could cause a Gateway Timeout error when submitting a form, which in some cases also caused a connector to run twice for the same submission.
-
